No doubt about it, Darth Vader cast a long, dark shadow in the original *Star Wars* trilogy. As a Dark Lord of the Sith (powerful warriors who carried out dark-side Jedi magic), Vader made brave Rebels and Imperial bad guys alike tremble in fear. Emperor Palpatine may have been the mastermind of the Empire, but Vader was the dark force who carried out the Emperor's evil plans. Vader was so bad, there wasn't a need for any other Darths.
